

Architectural / Step & Pathway Lighting

LED Step Light

WHY-H155 Series

A compact 3W LED step light delivering 140LM/W from a die-cast aluminium housing with IP65-rated protection. Multi-voltage compatibility (DC 12/24V and AC110-265V), a soft natural-light output, and complete installation accessories make it suited to steps, pathways, decks, and marine environments.

3W

KEY FEATURES

Multi-Voltage Compatibility

Available for DC12/24V and AC110-265V supply, adapting to residential, marine, and commercial power standards without additional conversion hardware.

Die-Cast Aluminium Housing

High-strength die-cast aluminium provides excellent heat dissipation, corrosion resistance, and anti-ageing properties for sustained outdoor service life.

IP65 Dust & Water Protection

IP65-rated protection ensures reliable operation in rain, snow, humidity, and dusty outdoor environments.

Simple Integrated Installation

Integrated structural design with complete accessories included allows straightforward installation with minimal tools, suitable for direct fixing to steps, walls, and decking.

Soft, Natural-Light Output

Optical light distribution delivers soft, natural-like illumination without harsh glare, minimising visual discomfort for pedestrian and residential use.

5-Year Warranty

Backed by a comprehensive 5-year product warranty.
